REPLY BRIEF

Commissioner for Patents
Mail Stop Appeal Briefs – Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

This Reply Brief is submitted in response to the Examiner's Answer dated December 29, 2003, in the Appeal of the above-identified application.

CERTIFICATE OF FACSIMILE TRANSMISSION	
37 C.F.R. § 1.8(a)	
I hereby certify that this correspondence is being facsimile transmitted to the United States Patent and Trademark Office, Attention: Examiner Javid Amini at 703-872-9315, on the date below.	
Date 2/27/04	Signature of Annie Zohlen 

REMARKS

In traversing Applicant's argument with respect to the Examiner's rejection under 35 U.S.C. § 112, *first paragraph*, the Examiner has apparently engaged quote "cropping". Specifically, in response to the Examiner's position that the Applicant had not set forth how analysis of the data page occurs, the Applicant referred the Examiner to the present specification "at page 7, lines 15 et seq. . . ." The Examiner has chosen to truncate this reference and quotes the portion which lies on page 7 between lines 8-20. The Examiner then further notes that the specification contains "not even a brief engineering procedure or method that shows mathematically or programmably any of the data page analysis on the mentioned page."

Applicant believes the Examiner's position is not well founded in view of the fact that page 7, at line 23 et seq., expressly recites "the device then displays the page in the default orientation (step 315), which will be referred to as Display Model. The user can then set the default orientation to either the wide or narrow orientation. Alternatively, the device can automatically determine the best-fit orientation for the display. By examining the line-width of the text being received, the device will determine whether the wide or narrow orientation will be used as the default orientation for that set of text." (*emphasis added*)

Consequently, Applicant respectfully traverses the Examiner's position and notes once again that it is well settled that a patent must contain a description which enables one skilled in the art to make and use the claimed invention but need not explain every detail since the inventor is speaking to those skilled in the art. An analysis of the line-width of text or visual display is considered to be well within the ambit of those having ordinary skill in this art and the Examiner's rejection of claims 28-30, under 35 U.S.C. § 112, *first paragraph*, is once again respectfully traversed.

No fee is believed to be necessary; however, in the event that any fee is required, please charge it to **BRACEWELL & PATTERSON DEPOSIT ACCOUNT NO. 50-0259.**

Respectfully submitted,

Andrew J. Dillon
